

Profile:

I work predominantly in full-stack development. My career started in 2012 and since then I have gained extensive experience in web design and development in a professional environment. I frequently work on Front-End and Back-End Development with complex interactions and integration with different Javascript Frameworks. I have key skills in usability, accessibility, State Management, API development, advanced PHP and Javascript-based front end and back end development, responsive design, mobile application, and user interface design using a range of web technologies. I work equally well alone and as part of a global multi-functional team. I have good practical, communication, and organizational skills, being a mentor and team leader. I'm currently employed by the **British American Resource Center** as a Full-Stack Developer developing and maintaining their global marketing sites promoting the brand and products.
